## Samsung Galaxy Apps Development - class 6

*VIA is an Internet applications development course focusing on design of mobile web applications for students. VIA class number six (time flies) took place last Thursday.*

Thanks to the generous Samsung donation all of us in VIA course work on the same software as well as hardware. The new Galaxy tablets are great and we are all excited. Most of the students are already getting familiar with the new capabilities. Tablets will become their primary target platform. It is great advantage getting the latest technology as soon as released. Especially in this case, tablets are changing the way we will use Internet. Playing with
